

City of Växjö

Telestadshöjden Wetland

A wetland with maximum values!

CHALLENGE

Excavated ditch in monocultural forest with zero ability to hold water in the landscape.

APPROACH

Nature based solutions favour ecosystem services.

IMPACT

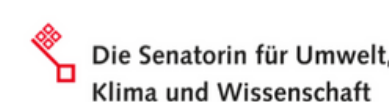

We develop a wetland environment that prevents flooding and regulates water, but also encourages activity, outdoor education and creates various habitats.

@biodiverscities

Biodiverse Cities

CHALLENGE

Very low to zero ecological values at the pilot spot today.

APPROACH

Nature based solutions favour ecosystem services.

IMPACT

We develop a preschool environment with nature-friendly structures and habitats that also encourage outdoor education and stimulate activity.
