🇩🇰 **Pilot Area - Denmark, Municipality of Vordingborg**

PROBLEM IDENTIFICATION
Mobilizing ecosystems in Vordingborg South Harbour, Sydhavnen

The recreational harbour Sydhavnen has a lack of city life and activities by the waterways and water fronts. The pilot area team around Sydhavnen has identified shared interests, challenges and possibilities and has developed a set of values for the area.

MOBILIZATION AND COOPERATION

EXPLORE INVESTIGATE — **PROBLEM IDENTIFICATION** — DEFINE FRAME

DEVELOP IDEA GENERATION — **SOLUTION DEVELOPMENT** — CONCEPTUAL IZATION

TESTING AND TRIAL

VALUE PROGRAM

VISUALIZATION OF PROTOTYPES

KNOWLEDGE SHARING AND INPUT TO DEVELOPMENT PLAN

Process and activities in mobilizing the ecosystem

1. **Problem identification: Open-Mic and field trip with multiple stakeholders** (5th Sep)

2. **Solution development:** Ideation and AI Prototyping with the pilot area team (19th Sep)

3. **Testing and trial** (Oct/Nov)

4. **Knowledge sharing** and input to the development plan

---

Set of values

…arrival
- create wayfinding to the water
- clearly marked by visual landmarks
- carefully integrated with the city center
- prioritizes soft road users

…reason-to-go
- is experiences on/in the water
- a flexible cultural platform
- is the urban character
- is the opportunity to be noisy

SET OF VALUES

VORDINGBORG SYDHAVN

…everyday life
- offers meeting and seating areas
- connected functions/experiences
- centers around the Kulturarkaden and everyday functions

…the meeting with the water
- provides variated zones
- actively using art
- features weather as a design principle
- relates to the industrial harbour
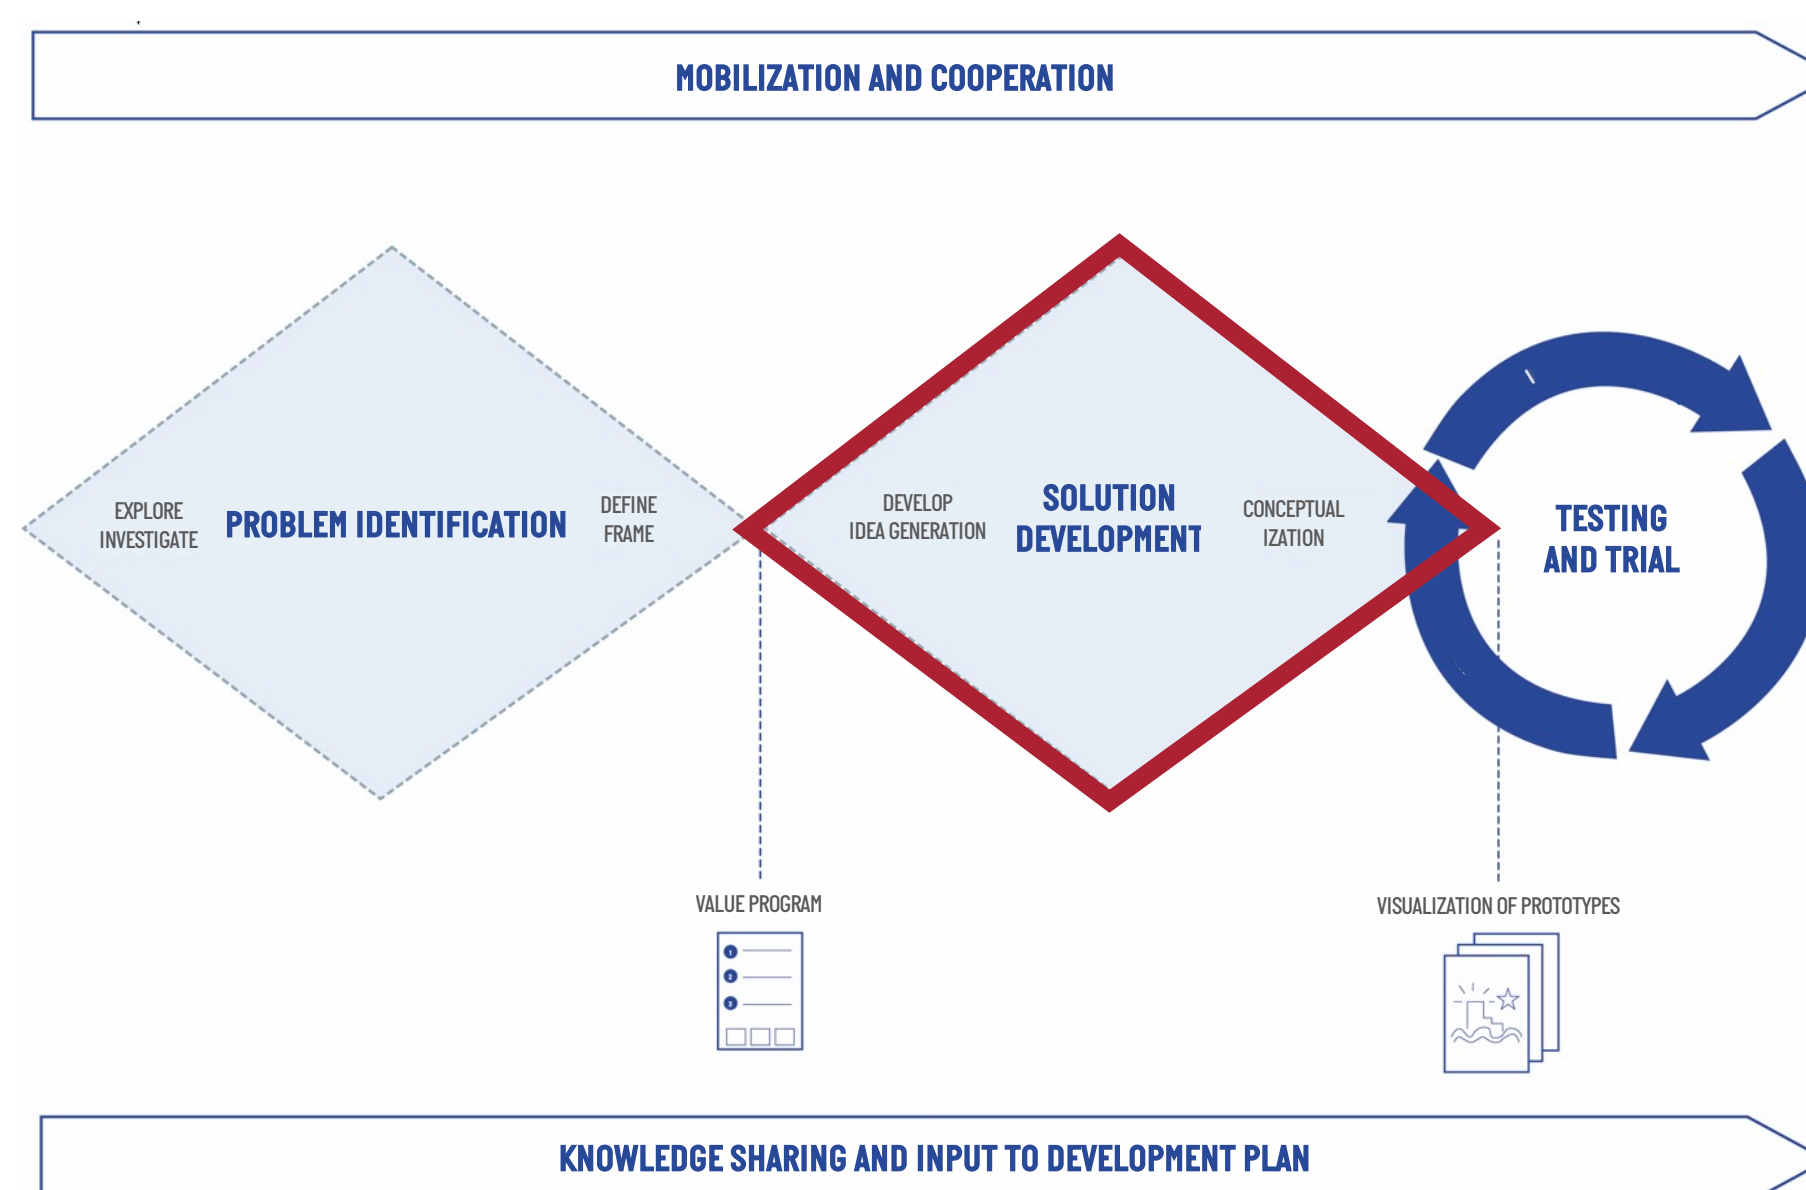

Open-Mic and field trip with multiple stakeholders

Interreg
North Sea

Co-funded by
the European Union

Connected River

VORDINGBORG KOMMUNE

Connected River
Be like water

SOLUTION DEVELOPMENT
Mobilizing ecosystems in Vordingborg South Harbour, Sydhavnen

Based on the set of values and the experiment question, the pilot area team generated ideas and came up with the concept of a social sauna. The team then co-created prototypes via AI generated images.

MOBILIZATION AND COOPERATION

EXPLORE INVESTIGATE — **PROBLEM IDENTIFICATION** — DEFINE FRAME

DEVELOP IDEA GENERATION — **SOLUTION DEVELOPMENT** — CONCEPTUAL IZATION

TESTING AND TRIAL

VALUE PROGRAM

VISUALIZATION OF PROTOTYPES

KNOWLEDGE SHARING AND INPUT TO DEVELOPMENT PLAN

Process and activities in mobilizing the ecosystem

1. **Problem identification**: Open-Mic and field trip with multiple stakeholders (5th Sep)

2. **Solution development: Ideation and AI Prototyping with the pilot area team** (19th Sep)

3. **Testing and trial** (Oct/Nov)

4. **Knowledge sharing** and input to the development plan

Prototyping the social sauna using AI

Experiment Question for the solution development:

*How can Kulturarkaden be **strengthened** as the area's **social meeting** place through the activation and staging of the **water as a driving force** for urban life, while preserving the **urban character** of the harbour?*
