

DigiH4A

Digital Health for All

Reshaping the future of healthcare delivery in the North Sea region with digital health innovations.

Meeting the region's healthcare needs with digital solutions

With rising healthcare costs, chronic diseases, and growing demands from ageing populations, the need for accessible, cost-effective health solutions has never been greater.

Duration: 2024-2027

Budget: €4,211,000

No. of partners: 11

Participating countries: 7
(Belgium, Denmark, France, Germany, the Netherlands, Norway, and Sweden)

DigiH4A is collaborating with companies to:

- **Develop innovative reimbursement models** that will increase the adoption of digital health solutions.
- **Create cost-benefit analysis methods** to demonstrate the value of digital solutions in healthcare.
- **Transform care delivery** and enhance patient outcomes across the North Sea region.
- **Deliver a strategic action plan** to guide healthcare decision-makers, providers, and payers in integrating digital health solutions into existing systems.
