

A strategy for strengthening governance structures for Hydrogen development

Our INTERREG project aims to enhance network structures for the governance of hydrogen developments. These network-based governance structures are particularly important in the emerging hydrogen sector. The strategy focuses on enabling regional authorities to take a stronger orchestration role in hydrogen development through stakeholder engagement and institutional capacity-building.

To achieve this, we accelerate three pilot initiatives under the EHRIN framework—regional development conferences that serve as experimental platforms for collaborative governance. These pilots convene diverse regional stakeholders, fostering dialogue, shared learning and joint action. By capturing and synthesizing the practices, tools, and insights from these pilots, in a Take-off guide, we aim to develop transferable practises that regional authorities can adopt to coordinate complex hydrogen initiatives more effectively.

The agenda of the regional development conference is designed as a structured intervention to operationalize the project's strategic goals. Each agenda element—stakeholder dialogues, thematic working sessions, and capacity-building workshops—corresponds to a core pillar of the strategy: fostering structured learning, enabling multi-actor engagement, and strengthening institutional capacity. By aligning conference activities with these strategic enablers, the agenda ensures that each event contributes to building the durable, trust-based network structures required for effective hydrogen governance.

The agenda is for the Development Conference in Malmö is as follows:

Länsstyrelserna

Partner meeting

2 days meeting for project partners
and strategic stakeholders

Overall agenda

Meeting is planned for two days, where during Day 1 we are going to have an opportunity to join an INTERREG conference on issues connected to offshore wind power and hydrogen, organised by BOWE2H project.

Day 2 is going to be filled with study visit at municipal housing company Sjöbohem and its small scale and self-sufficient H2 energy solution in the morning, and development workshop in the afternoon.

And don't forget Day 0- the arrival day!

Hotel suggestions

Please read more on the next page.

Evening Day 0

Dinner. Time 18.00. Place tbc.

Transportation

Necessary only to and from study visit.

Organized by the Swedish team. Tbc.

Overall practical information

Dates:

17-18 April 2024

Suggested arrival:

16 April

Place:

Malmö- day 1

Sjöbo & Malmö- day 2

Registration:

Obligatory for Day 1, latest 17 March

Confirm number of participants to Dagmara for organisational purposes.

Länsstyrelserna

Day 0 information

Evening:

Welcome to Malmö dinner at 18.00. Restaurant Nam Do, central Malmö. Details tbc.

Day 1 information

Venue:

St:Gertrud conference centre, address: Östergatan 7B, Malmö. Registration required.
Walking distance from your hotel.

Registration:

[Offshore wind and green hydrogen conference \(office.com\)](https://www.office.com) latest by 17 March

City tour:

Guided city tour with "Malmö by foot". Slightly over 1h walking in the city with a guide.

Evening:

Dinner 19.00. Details tbc.

Day 2 information

Venue 1:

Sjöbohem, address: Verkstadsgatan 2B, Sjöbo.

Venue 2:

Länsstyrelsen's office. Södergatan 5, Malmö.

Transportation:

From Malmö to Sjöbo and back. Minibus with pick up at Stortorget.

Evening:

At your disposal.

18 April

Study visit

Workshop: Tools/methods for stakeholder engagement

Several short presentations with following Q&A. Discussion and workshop on methods. The goal is to gather a plethora of different engagement tools and examples of use that can be adapted to future hydrogen projects.

Preparations:

We would be thrilled if all partners would like to prepare a max 10 min presentation on their best method/tool for stakeholder engagement. Non obligatory. Please confirm if interested.
