

Bremen (DE)

Q45

Our inhabitants

The Q45 Bundeswehrhochhaus project consists of 162 social housing apartments for 270 inhabitants. The target groups include low-income households, students and families. The site will include offices, shops, restaurants and other proximity services.

Shared Mobility

The future residents of the Q45 neighbourhood will have access to diverse shared mobility offer that caters for all their needs: car, bike and cargo bike sharing. Tram, bus and train connections are available within walking distance.

Mobility Plan

People living on this new site will be informed about the mobility offer through a tailored communication concept. Moreover, the future inhabitants will have access to high quality bike parking, and bike repair cafés will be organised regularly.
