Jåttå-Nord

Our Inhabitants

The Jåttå development project consists of 1000 housing units for over 2500 inhabitants from all income groups. The site will include grocery stores, meeting places, cafés and more amenities.

Shared Mobility

The future residents of Jåttå will have access to a regional mobility hub, consisting of a Bus Rapid Transport system (BRT), train connections and shared mobility services like electric city bikes, e-scooters, and more.

Mobility Plan

The Jåttå development project will provide integrated Living as a Service (LaaS) through the Heime-app. The app offers access to practical tools, mobility services, and engaging activities.
