

Utrecht (NL)

Lunetten

Our Inhabitants

Multiple housing projects are being planned and realised around the Utrecht Lunetten railway station. The flex-houses 'Tussen de Rails' aim at starters. The 'Brennerbaan' project also caters for older residents. Both projects provide affordable rental units.

Shared Mobility

The real estate developments will have limited parking options. A mobility hub will be realised for the flex-houses. For Brennerbaan, a cooperative sharing model is being investigated. The train station, situated between both housing developments, has potential for a shared mobility offer.

Mobility Plan

The mobility plan for Lunetten consists of multimodal, shared options that are easily accessible from the flex-houses and Brennerbaan. A tailored offer will be developed for the residents. This allows them to decrease their private car usage and to try alternatives instead.
