DIOL

Smart drone offshore transport

Unmanned drones from Esbjerg to further green transition in the North Sea

PORT **ESBJERG**

To develop innovative offshore logistics using drones for safer, greener North Sea operations

Port Esbjerg's Role:

- Design and Build a Drone Port.
- Provide infrastructure and logistical support for pilot operations and stakeholders in the vicinity of the port area and beyond.
- Collaborate on integrating drone services with offshore wind logistics and other renewable energy sectors.

Overall Impact:

- The project boosts efficiency and sustainability in North Sea offshore logistics

Offshore wind activities
