

Data for All

Do data – for a Greener Future

CO₂ Emissions Monitoring Solution

Gitte Alberen

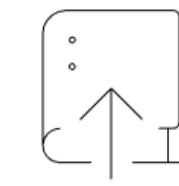

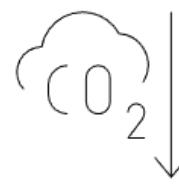

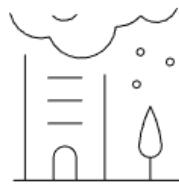

Vejle Municipality,
Business Services

gital@vejle.dk

WHY

Do Data – for a Greener Future

Municipal Services

Strong business services and climate focus are essential.

Alexandra Institute

Open standards and applied technology are key.

Emissions Data

Companies require reliable Scope 1–3 emissions data.

Climate Compass

The Climate Compass offers validated calculations.

Data to Action

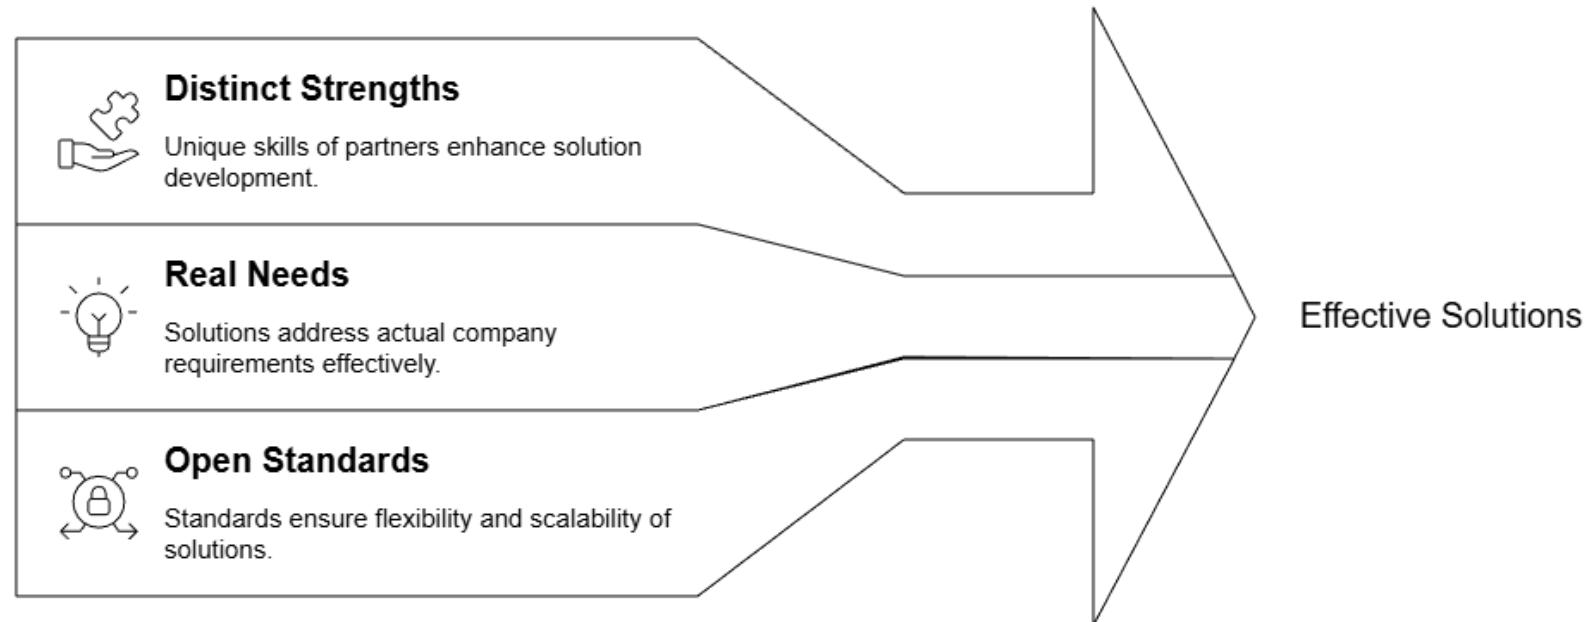

Data should drive action, not just be numbers.

Data for All

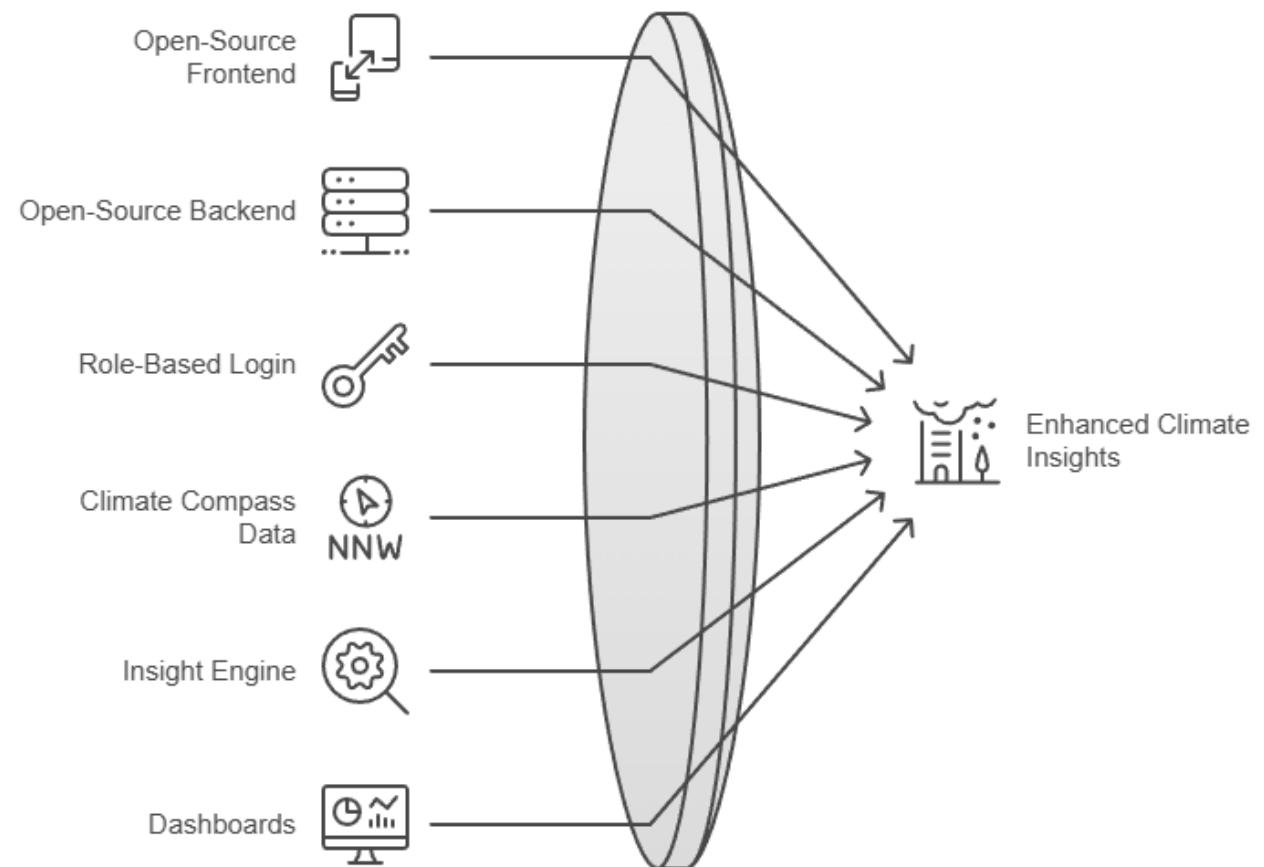

HOW

Do Data – for a Greener Future

WHAT

Do Data – for a Greener Future

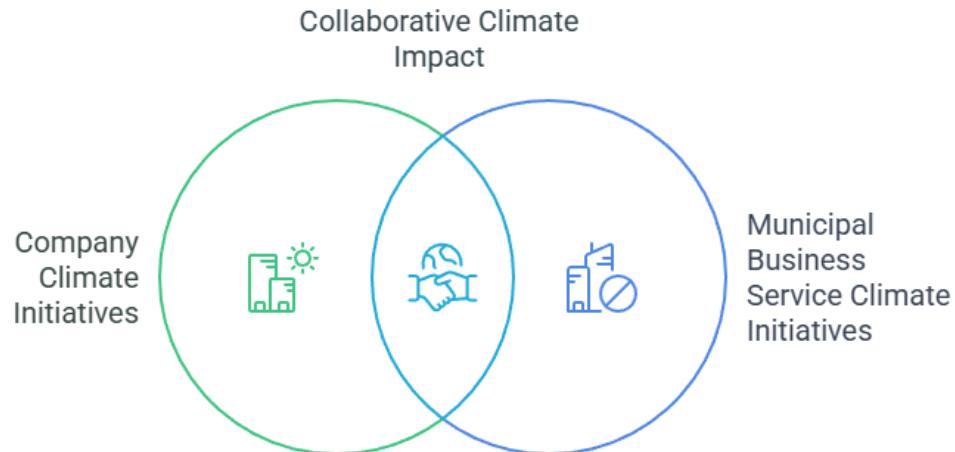

WHO

Do Data – for a Greener Future

- Climate-conscious SMEs and Climate Compass users
- Municipal climate teams and business services
- Companies in climate partnership agreements

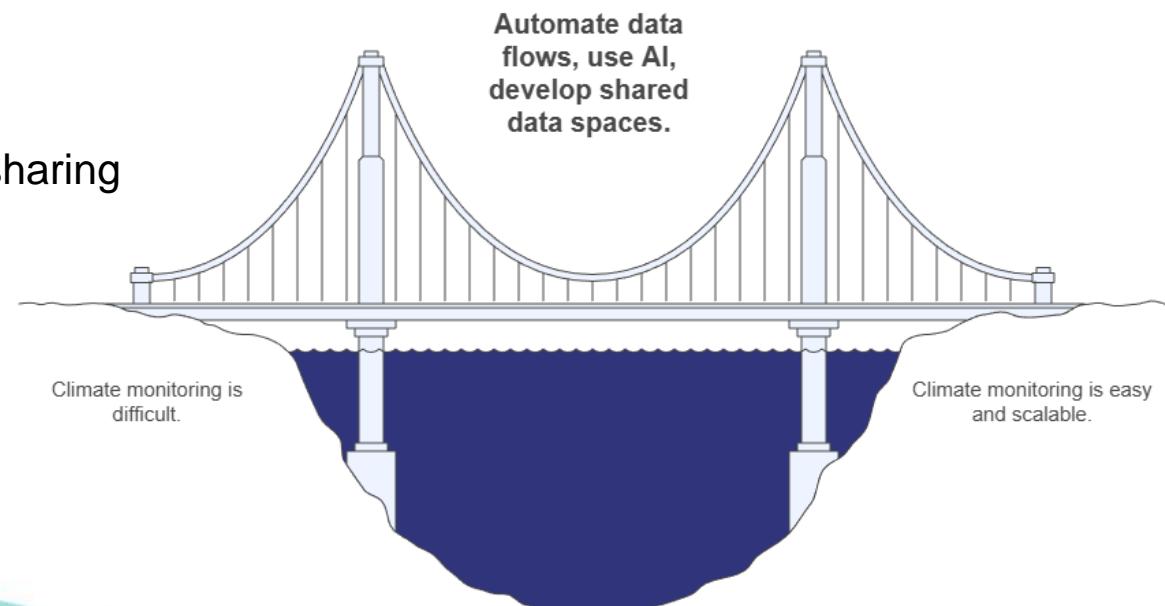

Powering Climate Action Through Partnership

Do Data – for a Greener Future

- Potential for automatic data flow with Climate Compass
- Expanded use of AI for reporting, insights and data cleaning
- More coherent workflows for companies
- Support for targeted municipal climate action
- Data Spaces enable secure and responsible data sharing

Lessons learned & Key Takeaways

In the Do Data – for a Greener Future pilot
